

SUMMER STEM CHALLENGE

To encourage you to think about the skills you will require at SJN we have set you a Summer STEM Challenge which will contribute to your House Points.

Have a go at these activities over the Summer holidays and send photographic evidence of your completion. For each task completed you will receive a House Point. The points will be added together for each pupil to see which House wins the Holiday STEM Challenge.

**Design and make
your own
catapult**

**Build a
bridge to
hold a can**

**Create a
crazy
recycled
hat**

Please bring your project to your first Science lesson in September!
